CONTENTS

Number 1

P. GERMANN and K. BEVEN. Water flow in soil macropores I. An experimental approach 1

K. BEVEN and P. GERMANN. Water flow in soil macropores II. A combined flow model 15

P. GERMAN and K. BEVEN. Water flow in soil macropores III. A statistical approach 31

H. GHADIRI and D. PAYNE. Raindrop impact stress 41

P. S. BLACKWELL and B. D. SOANE. A method of predicting bulk density changes in field soils resulting from compaction by agricultural traffic . . 51

E. SIBBESEN. Some new equations to describe phosphate sorption by soils . 67

J. S. FREEMAN and D. L. ROWELL. The adsorption and precipitation of phosphate onto calcite 75

Y. K. SOON. Solubility and sorption of cadmium in soils amended with sewage sludge 85

D. C. WHITEHEAD. The volatilisation, from soils and mixtures of soil components, of iodine added as potassium iodide 97

A. H. SINCLAIR and J. TINSLEY. Studies of soil organic matter using formic acid solvents: factors affecting composition and degree of formylation of organic isolates 103

K. N. WICKRAMASINGHE and O. TALIBUDEEN. Denitrification in a very acid tropical soil 119

R. WEBSTER and A. B. MCBRATNEY. Soil segment overlap in character space and its implications for soil classification 133

H. L. FOSTER. The basic factors which determine inherent soil fertility in Uganda 149

LETTERS TO THE EDITOR

R. S. Murray and J. P. Quirk: Comments on recent work with critical point dried soils. Replies by A. C. D. Newman and G. P. Lawrence, D. Payne and D. J. Greenland 161

Books on soil science recently received 165

Number 2

M. A. WILSON. Applications of nuclear magnetic resonance spectroscopy to the study of the structure of soil organic matter 167

W. H. UTOMO and A. R. DEXTER. Tilth mellowing 187

W. H. UTOMO and A. R. DEXTER. Soil friability 203

C. QUANSAH. The effect of soil type, slope, rain intensity, and their interactions on splash detachment and transport 215

P. B. BARRACLOUGH and P. B. TINKER. The determination of ionic diffusion coefficients in field soils. I. Diffusion coefficients in sieved soils in relation to water content and bulk density 225

H. FRENKEL and I. SHAINBERG. Structure formation upon mixing Na–montmorillonite with bi- and trivalent ion-clays 237

R. G. MCLAREN, R. S. SWIFT, and J. G. WILLIAMS. The adsorption of copper by soil materials at low equilibrium solution concentrations 247

S. C. JARVIS. Copper sorption by soils at low concentrations and relation to uptake by plants 257

ALY ABD-ELFATTAH and KOJI WADA. Adsorption of lead, copper, zinc, cobalt, and cadmium by soils that differ in cation-exchange materials 271

P. H. LE MARE. Exchangeable phosphorus, estimates of it from amorphous iron oxides, and soil solution phosphorus, in relation to phosphorus taken up by maize 285

Number 3

D. J. GREENLAND. Soil management and soil degradation 301

B. C. BALL, the late W. HARRIS, and J. R. BURFORD. A laboratory method to measure gas diffusion and flow in soil and other porous materials 323

W. H. UTOMO and A. R. DEXTER. Age hardening of agricultural top soils . 335

B. A. GOODMAN and D. G. LEWIS. Mössbauer spectra of aluminous goethites (α-FeOOH) 351

J. R. MCLAUGHLIN, J. C. RYDEN, and J. K. SYERS. Sorption of inorganic phosphate by iron- and aluminium-containing soil components 365

H. DAVIS and C. J. B. MOTT. Titrations of fulvic acid fractions. I. Interactions influencing the dissociation/reprotonation equilibria 379

H. DAVIS and C. J. B. MOTT. Titrations of fulvic acid fractions. II. Chemical changes at high pH 393

N. J. BARROW, L. MADRID, and the late A. M. POSNER. A partial model for the rate of adsorption and desorption of phosphate by goethite 399

W. R. FISCHER, T. PFANNEBERG, E.-A. NIEDERBUDDE, and R. MEDINA. Transformation of ^{15}N-labelled ammonium in two soils differing in NH_4-fixing capacity 409

M. A. WILSON, P. F. BARRON, and K. M. GOH. Cross polarisation ^{14}C-nmr spectroscopy of some genetically related New Zealand soils 419

O. K. BORGGAARD. Selective extraction of amorphous iron oxides by EDTA from selected soils of Denmark and Tanzania 427

S. T. TRUDGILL, A. M. PICKLES, T. P. BURT, and R. W. CRABTREE. Nitrate losses in soil drainage waters in relation to water flow rate on a deciduous woodland site 433

B. I. KRONBERG and H. W. NESBITT. Quantification of weathering, soil geochemistry and soil fertility 443

E. COYLE and J. F. COLLINS. Changes in the physical and chemical properties of a mineral topsoil under the influence of peat debris 453

I. D. HILL. A method for the quantitative measurement of anisotropic plasma in soil thin sections 461

Number 4

B. C. BALL. Modelling of soil pores as tubes using gas permeabilities, gas diffusivities and water release 465

B. C. BALL. Pore characteristics of soils from two cultivation experiments as shown by gas diffusivities and permeabilities and air-filled porosities . . 483

G. D. TOWNER. The correction of *in situ* tensiometer readings for overburden pressures in swelling soils 499

B. W. BACHE, C. A. FROST and R. H. E. INKSON. Moisture release characteristics and porosity of twelve Scottish soil series and their variability . . 505

J. B. REID and M. J. GOSS. Effect of living roots of different plant species on the aggregate stability of two arable soils 521

N. ALPEROVITCH, I. SHAINBERG and R. KEREN. Specific effect of magnesium on the hydraulic conductivity of sodic soils 543
